(54) PACKAGING BAG

(57) Abstract:

PURPOSE: To easily effect the opening and closing of a tape sealed part of a packaging bag having its contents stored in an airtight condition after filling the contents through an opening part at one side of the bag.

CONSTITUTION: In a packaging bag P having an opening part 2 at one side of a plastic film made bag 1 and an air suction value 3 at a predetermined place, self-adhesive tapes 4 are attached to the opposite sides of the inner surface of the opening part 2. To use this bag, the bag is filled with its contents through the opening part 2, which is then sealed with the self-adhesive tapes 4 through the cohesive property.
